Why Support the VRC?

There are about 590 veterans using their GI benefits and perhaps another 590 enrolled in one or more programs at the college. That represents almost 6% of the student body.

Established in 2014, the Veterans Resource Center provides books through a loan program, academic assistance in math and English, computer access, mentoring, the emotional support of being among peers and a place to relax, initiated a dental screening and basic dental care services arrangement with the dental technician program at the college, cost free outreach to dental specialty care, occasional financial assistance for things not covered through GI benefits, and hosts several social events throughout the year.

As a result, student veterans who use the center have significantly higher retention and completion rates than veterans who do not take advantage of what the center offers.

In 2018, Clark College was named by Military Times one of the top 100 community colleges for veterans' services in the country.

Your donation will assist the center maintain and expand its services and reach out to a greater number of veterans.
